

Orbit Digital | Response to City Services Digital Procurement Platform

Executive Summary

Orbit Digital brings extensive delivery experience and a proven support organisation for procurement transformation.

Proposed Solution and Implementation Approach

The proposal describes configurable workflow screens and a modern cloud service, but the ERP and identity integration approach remains high level and requires discovery.

Timeline, Team Structure, and Milestones

Eighteen-week delivery with experienced programme leadership, discovery workshops, configuration, testing, and launch milestones.

Commercial Proposal

Total price: \$355,000. Assumptions cover customer availability and training; integration effort is subject to discovery.

Item	Amount
Implementation and launch	\$355,000
Support	See assumptions above

Security, Compliance, and Risk Controls

Security controls include encryption, access management, audit logging, privacy processes, and an annual compliance review.

Support, Relevant Experience, and References

24/7 support, named service manager, quarterly service reviews, and eight large-client references.

Key Assumptions and Risks

The customer will provide timely decisions, access to required systems, and nominated business representatives. Risks will be reviewed in weekly governance meetings.
